Cyberbullying

Not all bullies are on the playground.

From a 14 year-old girl from New Jersey:

"Being bullied over the internet is worse. It's torment and hurts. They say 'sticks and stones may break my bones, but words will never hurt me.' That quote is a lie and I don't believe in it. Sticks and stones may cause nasty cuts and scars, but those cuts and scars will heal. Insultive words hurt and sometimes take forever to heal."
